

# GROW. FEED. EDUCATE. GIVE BACK PROGRAM™

<https://thefarm.com.au/kids-online-education>

## KIDS ONLINE EDUCATION

A holistic education program for children aged 3-10 in collaboration with the education team from Whole Beings®.

The Grow. Feed. Educate. Give Back Program™ takes each child on an organic learning journey through nature's classroom as it grows and feeds us. The 12 module program is based on the organic farming model of The Farm Byron Bay and offers a holistic approach to the lessons found on a working organic farm and beyond. The program is the first of its kind and is delivered by bachelor qualified teachers.

The program will guide learners through a series of real-world learning experiences on The Farm and create opportunities for those learnings to become home and community actions. With over 1 hour of exclusive Farm video content, 96 holistic experience guides accompanied with 48 micro content videos and more, each child will not only 'visit' The Farm using their Farm Passports to navigate the course—they will be part of the organic learning revolution and become a Farm Citizen!

***For every program sold a tree is planted!***

## THE NEXT GENERATION REGENERATORS PLANTING PROJECT

*For every program sold a tree is planted!*

As part of our Give Back vision, for every children's program sold a native tree is planted right here on The Farm Byron Bay. Children are the 'Next Generation Regenerators' learning the importance of land regeneration throughout the program. The planting project has been created to contribute to existing rainforest regeneration areas enhancing the biodiversity of the area, improving water quality & creating native wildlife corridors. We are very excited to have The Next Generation Regenerators part of this ongoing planting project — giving back to the earth, the community & the planet.
